Enon Java Training

Worksheet 5

Exercise 1: **Blast Off**

Instructions: We're going to create a program that counts down from a predetermined number, and prints a message when it arrives at 0

1. declare an integer variable called **count** and initialize it to **10**
2. Create a for-loop like the following:

```
for (int i = count; i >= 0; i = i – 1){
        System.out.println("Countdown: " + i);
}
```

3. After the for-loop place the following line:

```
System.out.println("Blast Off!");
```

4. **Have the TA check your work**
